DON'T GET FOOLED

Protecting Yourself in the Age of Cybercrime

WEDNESDAY, APRIL 1, 2026, 4:30PM
VIA ZOOM

Cybersecurity isn't about paranoia. It's about preparation! In this engaging webinar, Partner & Senior Client Advisor **Nick Boyden** and cybersecurity expert **Danny Schwartze** break down how everyday people are being targeted, from phishing emails and deepfake voice scams to tech support fraud and password reuse.

You'll learn how criminals gather information, why urgency and fear are their most powerful tools, and the practical steps you can take to protect yourself and your family.

We'll cover simple, actionable best practices along with easy habits like pausing before you act and using a family code word.

Join us for a practical, real-world conversation on staying one step ahead.

SPEAKER:

Danny Schwartze brings together over a decade of experience in financial services and a mission-driven focus on cybersecurity education. During his time at Charles Schwab, he worked closely with advisors on technology decisions, gaining a firsthand understanding of how risk, trust, and client protection intersect in today's digital world.

He is now the Founder & CEO of YourCyberLife, a cybersecurity education platform dedicated to helping advisory firms, employees, and families better understand and defend against modern cyber threats. Danny is passionate about translating complex cyber risks into practical, real-world actions that strengthen trust and protect financial well-being.
